

July 2014 Administrator Report

Fair is coming up, cover crops are planted and it looks like its going to be a great display. Kenzie Stahl is putting together the power point presentation for the fair this year. We have the traeger grill for a drawing, Treasure CD is going to put together a traeger starter basket to include in the drawings. For entry I am thinking of doing a wheel of fortune or jeopardy game with trivia on soil health and cover crop identification.

2015 is going to be a super busy summer and fall for the conservation district. The Administrator biannual training and workshop is going to be held in Great Falls in June. It looks like the last week of July may be the best time for the Montana Youth Range Camp and of course our Soil Health workshop in December.

The outline of our workshop is coming together, due to other commitments Don Huber's schedule is a little limited. December 1st-2nd, 2015 are the dates I have scheduled.

The Forestry grant quarterly billing and report is complete and we should receive reimbursement in a couple of weeks.

Interns are busy and things are going well. Kenzie has had a chance to go out in the field with NRCS.

Flora has been working on the Treasure and Rosebud County producer Data base.

Both will be doing several project site visits throughout the month of July.
