

October 2014 Administrator Report

September flew by so fast and was a bit of a crazy month. I attended several meetings this month.

I attended the Administrator Meeting in Miles City, hosted by the Yellowstone River Conservation District Council. The meeting was very informative and it was an opportunity for some local input on many topics involving the Yellowstone River including 310's.

I attended a CBMPA Meeting, we welcomed the new coordinator and discussed at the length the next year for the committee. Coordinator and Administrator duties were discussed and hopefully communication and distribution of information and meeting information will run a little smoother.

Area IV was held in Joliet. Don Youngbauer accepted Dave Davenports 25 years of service to the conservation district pin and certificate. Our resolution passed and will be discussed at the State Convention in November. Dave Martin is working on the area display board and our contribution is going be on equipment rental and sales. It will be very interesting to see some of the things other cd's are working on in their communities. Lincoln County has a very successful recycling program that they started as a pilot and has been handed over to the county to continue.

Tree ordering information, ordering forms are all updated and available online at our website, links are on our Facebook page and we have the information available at the office. Last year I worked with Treasure CD and the Circle NRCS office and have agreed to work with some of those producers again this year.

The Forestry grant has not had any changes this last quarter and the quarterly report is in progress and will be completed by the 15th of October.

I have been making it a point to update our website and Facebook page weekly.

Our office will be receiving applications for the Sage Grouse Initiative Position that is opening in the Forsyth Office. The hiring committee will consist of MACD, Rocky, Kami, Dave and Myself.

Bobbi
