

July 2014

In the time I've been employed at the Rosebud Conservation District, I've planted, weeded, and watered the flower planters and the cover crop tubs. I've reviewed 310 permit files and those for no interest loans, gathering the information from them for follow-up activities.

I've designed fillable follow-up forms for both these and entered information into the computer for them. I've also been working on a mailing list for Treasure County, and am now involved in field visits for the follow-up on the above mentioned files
